

# FIT-FORM-FUNCTION

Simply replace it! – System Modernization  
with TEBECHOP SE Modules

**BENNING**  
World Class Power Solutions

Excellent Technology, Efficiency and Quality

## FIT-FORM-FUNCTION – the low-cost alternative compared to reinstallation

- modernization of the existing power supply system without any downtime by easy plug & play installation
- no conversion of the installed power supply system on site
- efficiency of the TEBECHOP SE modules >96%
- maximum energy efficiency

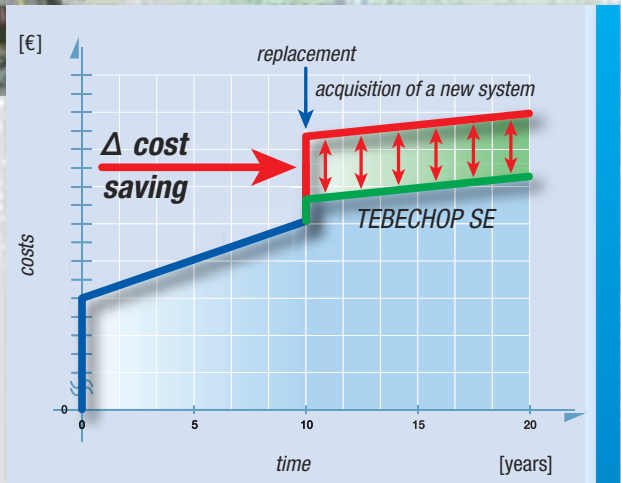

Fig. 1: Cost comparison between retrofitting with TEBECHOP SE modules and reinstallation of a power supply system

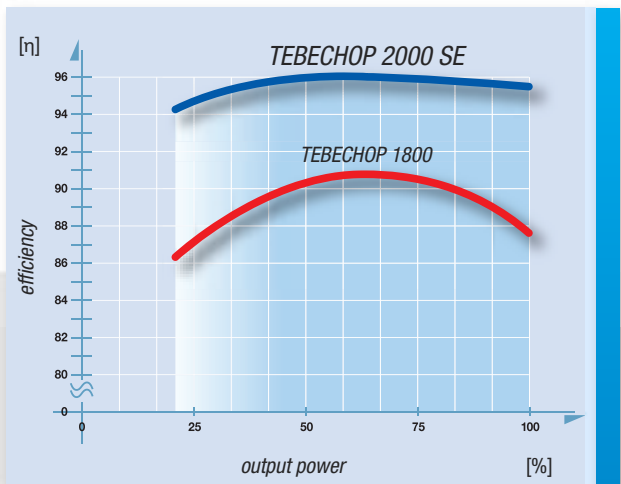

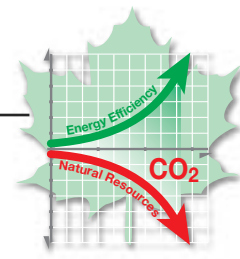

Fig. 2: Efficiency and output power

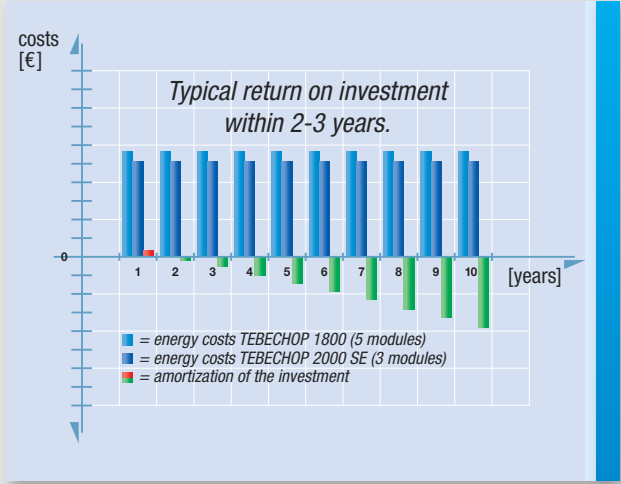

Fig. 3: Payback period and return on investment (ROI)

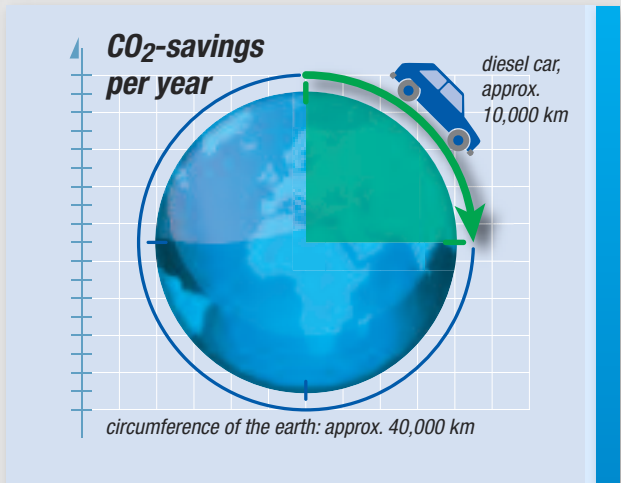

Fig. 4: In one year, the TEBECHOP 2000 SE (3 modules compared to 5 modules of the type TEBECHOP 1800) saves the amount of CO<sub>2</sub> that would be emitted by an average diesel passenger car with a mileage of approx. 10,000 km.

### Simply replace it!

Your advantages at a glance:

- no conversion of the existing power supply system on site
- increased system availability due to installation of new TEBECHOP SE modules
- increased total efficiency of the power supply system
- reduction of electrical energy costs
- reduction of CO<sub>2</sub> emissions
- 2 year warranty (TEBECHOP SE modules)
